

GlenFarrow

COMMERCIAL HEATING

Commercial Heating

GlenFarrow has over 40 years' experience in the design, supply and installation of heating systems for commercial and industrial applications. Our engineers are fully qualified in all relevant disciplines (gas, LPG, oil and electrical heating systems), as well as specialising in the installation of biomass boilers. All systems can be designed and presented using CAD drawings, enabling greater precision in relaying information to our clients and in marking up drawings when working with architects and consultants.

Scope of Supply:

- Oil and gas boiler servicing
- 24 hour heating breakdown service
- Oil and gas fired boiler installation
- Biomass boilers supplied and installed
- Warm air heaters - oil or gas, fixed or portable
- Radiant heating oil or gas
- Oil storage tanks supplied and installed
- Oil and gas supply pipe work designed and installed
- Flue and ducting installations
- Heating and cooling systems designed and installed
- Extraction and filtration systems supplied and installed
- Pressurisation units
- Commercial fan coil unit heaters
- Commercial water heaters - oil, gas or electric

We work on a wide range of projects, covering applications such as industrial hot water systems and frost protection systems for horticultural glasshouses through to warm air heating for large warehouses.

About GlenFarrow

With over forty years' experience, GlenFarrow has developed a reputation for prompt, reliable service. Our expertise covers five core areas:

- Biomass Boilers
- Commercial Plumbing and Heating
- Electrical
- Irrigation
- Waste Water Treatment

Our skilled staff can undertake major installations, refits or small upgrades, as well as contract servicing and emergency breakdown call out. We also offer full trade counter support across all core areas.
