

Electrical Engineer

Salary £28-35K + Company Vehicle + Overtime

The role is to work within our growing core department of Electrical. A high level of technical knowledge, acumen and experience within a similar role is required and to meet the qualification requirements for the position.

The successful candidate will:

- Carry out servicing and installation works in a safe and efficient manner
- Attending site promptly as instructed
- Providing feedback to the office from works carried out
- Ordering materials as required for remedial works
- Promoting a positive image of the company when on-site
- Providing accurately completed certification to the office in a timely manner

The ideal candidate should be able to demonstrate the following:

- All relevant electrical qualifications attained and courses passed including City & Guilds 18th Edition (BS 7671:2018)
- Experience of electrical fault finding
- Knowledge of the electrical trade industry
- Managing time effectively
- Completing paperwork in a timely manner with a high attention to detail

A full driving licence is essential.
