IRRIGATION

Design, supply, installation and maintenance
of irrigation systems and equipment

Irrigation

Getting the design of an irrigation system right from the outset makes a huge difference to your water usage and its effectiveness. Appropriate integration of upgrades and additions is just as important as that's key to extending the life of a network.

GlenFarrow has been designing irrigation systems for over 45 years and that experience means we can develop a solution to meet your requirements, no matter how challenging they might be! Our highly experienced team works hard to supply, install and commission all elements while minimising the impact on your site.

Agriculture and horticulture

- Farms - including reservoir construction
- Garden centres and nurseries
- Glasshouses and polytunnels

Domestic and gardens

- Bore hole maintenance
- Filters
- Garden Irrigation systems installed and maintained

Sports turf irrigation

Regular and controlled watering of sports turf makes a real difference. Our team of engineers has experience of working at all levels from Premiership football clubs and prestigious equestrian centres right through to local bowling clubs and school sports pitches.

Our capabilities include:

- Football pitches
- Golf courses
- Race courses
- Gallops
- Hockey pitches
- Synthetic sports turf
- Equestrian centres
- Bowling greens
- Tennis courts
- Cricket squares and outfield

Dust /smell supression

- Quarries
- Yards
- Transport
- Waste transfer yards

Scope of supply

- Irrigation sprinklers and control equipment
- Water tanks and storage
- Pumps supplied and installed
- Control systems
- Trenching and mole ploughing services
- Rainwater harvesting
- Filtration systems
- Borehole services
- On site – maintenance and repairs

Trade Counter

Our trade counter has a wide range of irrigation products and spare parts available for next day delivery.

Contact **Darren Barber** on 01775 722327 or darren.barber@glenfarrow.co.uk

- MDPE, steel, PVC, pipework and fittings
- Sprinklers: impact, pop-up, drip
- Suction, delivery hoses, quick release coupling, hose carts
- Pumps
- All types of valves: manual, electric, battery operated solenoid valves
- Water meters new and re-calibrated to EA specification
- Workshop tools, sundries

Suppliers

We make best use of new technology wherever appropriate and are authorised distributors for most major irrigation equipment suppliers, including:

- Bermad
- Calpeda
- Caprari
- Dab
- Dosatron
- Ebara
- Epco
- Grundfos
- Honda
- Hunter
- NAAN DAN JAIN
- RainBird
- T-tape
- Toro
- and more

About GlenFarrow

With over 45 years of experience, GlenFarrow has developed a reputation for prompt, reliable service.

Our expertise covers five core areas:

- Waste Water Treatment
- Biomass Boilers
- Commercial Plumbing and Heating
- Electrical
- Irrigation

Our skilled staff can undertake major installations, refits or small upgrades, as well as contract servicing and emergency breakdown call out. We also offer full trade counter support across all core areas.

What our customers say

“From design to build, I found GlenFarrow to be extremely helpful, with a wealth of experience on both design and installation. Even in some difficult ground conditions the overall job was very clean and tidy and the system now provides high volumes of water at any point during the day. The pop-ups have cut watering times from multiple hours to just minutes and I’ve also found the Hunter ICORE controller very helpful. It’s a very easy-to-use controller; not over complicated, but very effectively does the job required, enabling us to water at off peak times.”

Richard Dexter, Head of Grounds, Oakham School

“Getting the irrigation right is critical for our trials and this new system gives us flexibility, reliability and precision, which is just what we need. The GlenFarrow team did a great job and we know we can rely on them if we need any backup.”

Mark Leaman, Farm Manager (at time of installation)
